Table 2: Distribution of the number of gender-related cases heard per judge, 1996-2002.

“Weighted least squares results, gender cases only. Outcome is proportion of feminist votes. Models 1–4 are for all judges, while Models 5–8 are for judges with 1–4 children. (No judge among those with 1–4 children had four girls.) All models include fixed effects for number of children and use weights based on the number of cases heard by each judge.”
